

CONTENTS

<i>Foreword</i>	6
The water and sanitation programmes: Evolution and learnings	8
1. UPSCALING SOURCE SUSTAINABILITY: BEST PRACTICES	20
The Himalayas	
• West and South Sikkim: Rejuvenation of springs	26
• North Sikkim: Protection of springs	30
Northern Plains and Central Highlands	
• Ladana, Rajasthan: Conjunctive use of groundwater and surface water	36
Semi-arid regions	
• Junagadh, Gujarat: Conjunctive use of groundwater and surface water	40
Western Ghats	
• Dang, Gujarat: Replenishing groundwater levels	44
• Kerala: Communities manage their drinking-water supply	48
Deccan Plateau	
• Dharwad, Karnataka: Ponds revived to recharge groundwater	54
• Gadag, Karnataka: Moving to a surface-water source for sustainability	58
• Vikarabad, Telangana: Moving to a surface water source for sustainability	64
Eastern Ghats	
• Nuapada, Odisha: Replacing contaminated groundwater with safe surface water	72
• Keonjhar, Odisha: Solar pumps for uninterrupted drinking water	76
Coastal Plains	
• Guntur, Andhra Pradesh: Conjunctive use of surface and groundwater	80
• Bhadrak, Odisha: Conjunctive use of surface and groundwater	86
2. GREY-WATER MANAGEMENT: SUCCESS STORIES	90
Tackling waterlogging	
• Ariyanendal, Tamil Nadu: Soak pits prevent flooding	94
Reusing treated grey water	
• Nattathi, Tamil Nadu: Vegetables irrigated with treated grey water	102

Recharging groundwater with treated grey water	
• Mariyapuram, Telangana: Tackling plunging groundwater levels	108
Tackling grey-water stagnation and mosquito breeding	
• Ibrahimpur, Telangana: Modified soak pits prevent flooding	112
Controlling grey-water flooding	
• Padali Khurd and Devkevadi, Maharashtra: Modified soak pits prevent flooding	120
Managing grey water at the village level	
• Bajar Bhogaon and Jainapur, Maharashtra: Flooding prevented by use of specialized ponds	124
Developing a business model for reusing grey water	
• Shirol, Vadange, Alve and Kothali, Maharashtra: Remunerative use of treated grey water	130
Using grey water for irrigation	
• Koulav, Kothe and Kanthevadi, Maharashtra: Efficient use of treated grey water	134
Managing grey water to reduce river pollution	
• Gargoti, Maharashtra: Bio-filtration of grey water	138
Tackling pollution in nearby waterbodies	
• Sahibganj, Jharkhand: Absorbing grey water through modified leach pits	142
Tackling grey-water flooding and mosquito breeding	
• Ghughwa and Patora, Chhattisgarh: Using soak pits to prevent waterlogging	146
Sourcing funds to manage grey water	
• Yerlapady, Karnataka: Efficient use of MGNREGS funds	156
Managing grey water under the Wastewater Management Act	
• Karnal, Haryana: Legislative framework aids management of grey water	160
Using existing pond systems to treat grey water	
• Majri Akaliyan, Punjab: Ponds used as grey-water treatment systems	164

Reusing grey water for agriculture and groundwater recharge	
• Dhingi, Punjab: Multiple uses of treated grey water	168
Using dry ash to treat grey water	
• Lambra, Punjab: Innovative use of technology to treat grey water	174
3. TREATMENT OF FAECAL SLUDGE: SUCCESS STORIES	180
Onsite faecal sludge management	
• Kolhapur, Maharashtra: Effective toilet designs to treat faecal sludge onsite	186
• Sahibganj, Jharkhand: Effective toilet designs to treat faecal sludge onsite	192
• Durg, Chhattisgarh: Effective toilet designs to treat faecal sludge onsite	198
Offsite faecal sludge management	
• Dhenkanal and Balasore, Odisha: Formal use of urban facilities to treat rural faecal sludge	204
• Dausa, Rajasthan: Informal use of urban facilities to treat rural faecal sludge	216
• Siddipet, Telangana: Informal use of urban facilities to treat rural faecal sludge	218
• Karnataka: Building rural faecal sludge treatment plants	222
• Patan, Chhattisgarh: Building rural faecal sludge treatment plants	228
• Patora, Chhattisgarh: Motivating communities to manage faecal sludge	232
4. CONCLUSION AND RECOMMENDATIONS	238
