

CONTENTS

APPRAISAL..... 08

- Sunita Narain: On a changing world order marked by the growing insecurities of the rich and the increasing vulnerability of the poor

PERSPECTIVE..... 12

- Anumita Roychowdhury: On twin crises of air pollution, climate change
- Devinder Sharma: On technological reliance of agricultural revolution 4.0
- Poonam Muttreja: On the right to abortion

CHAPTER-1: STATE OF DEVELOPMENT30

- India's Sustainable Development Goal ranking
- How the states perform on development parameters

CHAPTER-2: CLIMATE CHANGE38

- Assam's vulnerability to floods and deficit rain
- Gazing at a warmer world in near future
- Post agreement, how quickly will world move on loss and damage fund
- Abnormal heat, rainfall patterns across India

CHAPTER-3: IN FOCUS-HUMAN 88

- Nobel laureate Svante Pääbo's study on what makes us uniquely human
- Changes in genetic structure in sync with climate change
- Tracking variations in human species over thousands of years

CHAPTER-4: HEALTH.....104

- Can the world agree on a legally binding treaty to prevent pandemics?
- Disease-carrying mosquitoes in new geographies
- Rise in heart ailments post COVID-19 outbreak
- More women in India own bank accounts, but ample scope to improve

CHAPTER-5: INDUSTRY 162

- Lacunae in certification, standardisation air emission monitoring
- Over 100 changes in Environment Impact Assessment Notification, 2006
- The polluting foundry sector set for expansion
- Shift from fossil fuels to biomass firing quite achievable in Delhi-NCR

CHAPTER-6: SPECIAL-DECARBONISATION.....196

- A crucial decade for iron and steel sector
- Cement industry has great scope to reduce emissions

CHAPTER-7: LIVESTOCK..... 210

- Surge in fodder rates is a result of changes in cropping patterns
- A way to regenerate dying grazing lands
- Lumpy skin disease, African swine fever on the rise in a warming world
- Herbal treatments, therapies with ethnoveterinary potential

CHAPTER-8: SPECIAL-METHANE 252

- Opportunity to reduce methane emissions by half this decade

CHAPTER-9: FOREST AND BIODIVERSITY 264

- Earth has lost 10 per cent of its forests in just three decades
- Have agroforestry, plantation drives helped India regain forest cover?
- Demand for community forest rights on the rise across India

CHAPTER-10: SPECIAL-OCEAN 306

- Ocean ecosystems are threatened by warming waters
- Change in ocean temperature detrimental to vital resources
- Call to protect at least 30 per cent of waters this decade

CHAPTER-11: RENEWABLE ENERGY324

- India must boost local solar manufacturing, fulfil WTO obligations
- India's ignored wind industry can help the country meet energy targets
- Green hydrogen can help India achieve energy security, climate goals

CHAPTER-12: HABITAT342

- Development must take into account impacts of a warming world
- States slow in meeting Energy Conservation Building Code
- Strategies to revive traditional construction methods

CHAPTER-13: IN COURT 364

- A glimpse of legal cases related to environment, development in 2022

CHAPTER-14: MOBILITY376

- Zero-emission: Pathway for transitioning to electric vehicles
- Need for a strategic, state-level push for electric vehicle adoption
- Inadequate data, stop-gap solutions ail National Clean Air Programme

CHAPTER-15: IN FOCUS-HIMALAYAS396

- Hindu Kush region sees low precipitation, delayed snowfall

CHAPTER-16: AGRICULTURE 402

- A millennia-old practice to improve soil health, boost farmer income
- A low-cost, plastic moisture diffuser to reduce water use by 40 per cent
- Six initiatives that show how market linkages help farmers raise income

CHAPTER-17: PLASTIC422

- World agrees to frame a treaty on ending plastic by 2024
- New amendment on extended producer responsibility unambitious
- India allows the use of recycled plastic for food applications

CHAPTER-18: IN FOCUS-SBM 2.0 446

- India needs concrete plan to deal with its legacy waste by 2024

CHAPTER-19: WATER 454

- Can Jal Jeevan Mission provide tapped water to rural India by 2024?
- Urban Jharkhand can use rain to reduce groundwater dependence
- Shrinking urban waterbodies aggravate problem of monsoonal flooding
