

# CONTENTS

<b>Land matters</b>	1
Chemicals and mining destroy the land. Organic farming and protest are weapons people use to protect it. And they have — in farms through the country and areas rich in minerals.	
<b>Water agenda</b>	31
Protecting and replenishing watersheds is the key to water security — for water to drink, to irrigate farms. And ingenuity is what it's all about: From reviving rivers to manufacturing glaciers.	
<b>Pollution control</b>	85
Rivers are choking, groundwater's going. But people are pitching in — with technologies to treat waste and alternatives to wasteful sanitation; by cleaning rivers and fighting polluting industries.	
<b>Woods and trees</b>	103
As the forests recedes, people step in. To protect what's left and revive what's gone. Communities show they are best equipped to deal with their own patches of forests.	
<b>Living resources</b>	127
Seeds, species, traditions. Just three things that countless folk protect. And protection is one thing they badly need — because with every passing day diversity comes increasingly under threat.	
<b>Handling waste</b>	159
Recycling is the mantra where good environmental sense prevails. People through the country have shown that problems of pollution can be solved if waste is seen as a resource, not a nuisance.	
<b>Taking care</b>	187
For many, cheap health care is just a dream. But people have shown this need not be so. Imagination, enterprise and the will to work together have taken health care off the beaten track.	
<b>Not conventional</b>	203
There's a lot of energy around. Some of it is being generated by unconventional folk from unlikely sources. From solar to biomass — everything is used to tap sustainable sources of energy.	
<b>Livelihood issues</b>	225
The most vulnerable suffer the most as doors close on ways of eking out a living. But the scenario is lightened by countless initiatives to restore livelihoods and help people help themselves.	
<b>Right angles</b>	241
Fishing communities are under threat, with mechanised trawlers poaching on their turf. But they have organised themselves and with innovative technologies salvaged their livelihoods	
<b>People power</b>	255
<i>Panchayats</i> throughout the country protect the environment from commercial interests. And villages declare independence to reclaim their rights to local resources that the state tries to monopolise.
